3-4	My Love Affair with the Blenheim	George Milson	missing assumed dead) Seeing, hearing & smelling the BB & its Mercury engines on its maiden journey recalled 24/08/1940 when, after 25hrs dual & 25hrs solo on Magisters, GM left 5 EFTS for 13 OTU, Bicester, (1 of 2 Group 2 OTUs with BBs) in experiment to see if potential Bomber Command pilots could skip FTS & ATS & flying Harvards, Oxfords & Ansons. Normally, after ATS, 3 aircrew (pilot, Obs & Wop/AG) would come together to OTU. Theory by F/Lt Instructor was thorough. Spent only 5hrs on dual BBMkI, then solo over West Country & up Welsh valleys & with 2 BB fuselages in Hangar doing drills blindfolded, etc. Once proficient to BB MkV & teamed with crew, both Sgt got 12/6p a day; as LAC GM got 4/- a day (all recieved 2/- per day flyng pay). Soon GM promoted Sgt too. Then 1 st night-flying from Hinton-in- the-Hedges; 3 circuits on dual (but other pilot mostly had control); 2 circuits solo, got

4		The Awful Truth!	Mike Henry	wings, then crew posted 18Sq, Great Massington on night ops! 04/1941 18Sq to Oulton, billetted Blickling Hall, on low-level shipping sweeps & 'circus' with 24 BBs in 'boxes' of 6 as 'bait' over N France with fighter escort. We survived tour of 30 ops, 90% didn't; average life of Grp 2 BB crew in 1941 was 3 wks! Delivered BBs to ME via Gibraltar & Malta & posted 84Sq, based Mosul. Then Iraq, Amriya, Desert, Egypt & FE, based P2 on Sumatra, then Java. Ron Miller & GM flew 497 hrs in BB together, incl 54 daylight ops & 9 at night. When GM went abroad was only one still flying of the 5 LAC he'd trained with; details fate of other four but doesn't name them. To promote 'Air Gunner' publisher, Colin West, arranged photo session with BB on 30/04/1997. MH got his feet in 1st & 2nd apertures in side of fuselage — but couldn't move further. 57 yrs ago he did this with
				flying boots & all equipment to get into turret hatch! In end climbed in through camera hatch under BB belly to sit in turret seat. Getting out was worse! It was easy 57yrs ago! Is this age? Thanks to Graham Warner.
5-8	Article	Random Recollections – 114 Squadron	Reg Stride	Details how BB Mkls were modified to MkIVs at Wyton for 114Sq, giving Obs own 'office' in new 'nose' (described). This done ® Bristol factory with 114Sq ground crew as 'helpers'. Other minor modifications were 'Mickey Mouse' (electtical stitch for Obs to drop bombs), thick armour behind pilot's seat, self-sealing tanks, rubber de-icing 'boots', balloon-wire cutters, IFF aerials (but no IFF transponders yet), and blanket with pockets for 'ever-hot' bags for Wop's equipment (detailed). Extensive training on MIIVs incl night-flying with blue electric 'glim light' instead of 'goose-neck' paraffin flares. RS saw first Heinkel 111 11/1939 over Wyton, probably on recce; no bombs or warning sirens. 12/1939 – 05/1940: Early 12/1939 114Sq prepares to move to France. Details 'War Equipment Schedules' (all items BB Sq need for several mths), how items packed & recorded, etc. Although move supposdly secret, known that AASF Battle Sqds (in France since 09/1939) needed BB MkIVs. In end 114Sq replaced 15Sq in Vraux Airfield (2km N village). RS in Advance Ground Staff party flying in seatless Armstrong-Whitworth 'Ensign' so room for essentials. At Vraux La Maison Rouge', on edge airfield, became Airfield HQ (1940 Pic) with Signals Section squeezed into basement. Most airmen accommodated in farmhouse hay-lofts. As 'Sgt Chef' (L/Sgt) RS had bed-sit in farmhouse annex; describes welcoming family. More training incl night flying. Still 'phoney war'; only leaflets dropped over enemy territory by Wop thru camera hatch! In cold Mercury engines froze (canvas covers & parafin heaters helped), as did accumulators & condensation made wireless equip unreliable so flying restricted. 03/1940: Marconi-Adcock HFDF station at S end

7	Obit	We See Their Faces, We Hear Their Voices – to Absent Friends		airstrip. RS did air calibration check with Sgt Hartland; DF will be invaluable. 04/1940 RS to Armament Training Camp, Perpignon & low-flying over Mediterranean (described). Quotes from 114Sq ORB for 10/04/1040 (Germany invades Netherlands, Belgium & Luxenburg; return to Vraux); 11/05/1940 (W/Cdr PM Wright replaces Sq/Ldr Outram as 114Sq CO & 12 Dornier DO17 attack Vraux). Attack detailed: 150x50Kg bombs dropped low level destroyed 5 BBs, set fire to petrol dump, machine guns damaged rest of BBs, left 36 bombs with 168-hr delays; two ground staff injured. Pic: Blenheim after raid. Other aerodromes bombed, but Vraux only low-level raid. 12/05/1940: Royal Engineers repaired aerodrome. 14/05/1940: Recce of Sedan, Givonne & Bouillon; 6 crews to Plivot to use 139Sq a/c. RS on duty 05.00 on 11/05/1940, & details personal experience of raid. Thought Dorniers were Handley Page 'Hampdens'. Dived into slit trench; trembling with fear at first then adrenaline took over. Raid lasted 7 mins. From German side, 45yrs after raid Herr Kruger (in 1935 transferred from German Cavalry to Luftwaffe as Obs in Junkers JU52s) then bomber pilot on Dornier DO17s (Pic of Herr Major Kruger). Raid by 9 Dorniers of 4/KG2 led by Sq/Ldr Lieut Reimers flying Dornier U5-LM; Kruger his Obs. Flew at 2-3metre height & undisturbed over Luxemburg & Maginot Line. Describes raid & what saw. W/O Borner (Obs in another a/c) filmed attack & General Loerzer congratulated No 4 Squadron. On return flight hit tree, attacked by MG fire & Lt Reimers hit in legs & couldn't steer. Wop pulled him from seat & Kruger (with no pilots licence) landed a/c at Frankfurt Rebstock Airport. Reimers had leg amputated. Few days later Germans broke thru to Sedan, Mourmelen heavily bombed & Vraux next. New CO, W/Cdr Wright gathered section heads; couldn't defend Vraux so need to retreat & re-group. Wellwritten combination of facts (from all sides) & personal experiences. (cont. 30/05) Mr JG Spinks (younger member, ide from leukaimia); Charles Hall (Aviation cartoonist 'Holly'
				Quinton (daughter Tracey now has his membership number); Mr Tom Mann (who helped with Archives); Mrs Arlette Tedder (called 'Harry' by WWII friends); Mr KW Wyatt; Mr Ted Coote (gave us story of Phantoms of 1940). Thanks for help; condolences to families & friends
8	Article	The Ghost of Blickling Hall (cont)	From Tommy Thompson	(cont from 28/06) Searching graveyeard with torch; lengthy reports about ammo & another unresolved mystery. Then about life & work of 114Sq ground crew; growing casualties (life expectancy Group 2 was 6 weeks!); from 09/1940 all days ran together - no weekends. Then 3 more nights of 'footsteps' in the lane, sentry's reaction &

	disbelief of those not having heard them. Well written & atmospheric. Locals at Buckinghamshire Arms ('Buck Arms') say 'Ghost' is 'Four in Hand' which drives
	through closed front gate (not footsteps!).

'Ex-Brats' Halton and Cranfield	4-6	Article	The Ghost of Blickling Hall: 114 Squadron Horsham St Faith and Aulton	Tommy Thompson (see end of notes)	Over 3 issues this is a vivid picture of life on 114Sq in 1940. Author arrived Horsham St Faith, nr Norwich, 06/1960 & met Duncan Townsend who a '33rder' in same class at Halton (ie 01/1036-1938). Describes first night exploring pubs in Mile Cross & consequences! Feeling at home as most ground-crew engineering trades were 'exbrats' from Halton & Cranfield, many later commissioned or pilots. Interesting & details description of community of 'ex-brats' (ie who entered Halton as boy apprentices, aged 15) who 'a Service within a Service', their practical & theoretical aeronautical knowledge & attitude of other RAF staff towards them. Excellent series of articles giving a detailed feel for life in RAF. (Tommy Thompson denies writing this. Was this written by Edward Thompson DFC who in 33 rd entry at Halton? Edward = 'Ed' = 'Skull'. See 30/07, 88/11 & 89/19)
	6-7	Letter	A Letter from Norway	Torstein Saksvik	Torstein, Halvor Sperbund, Steinar Larsen and Vidar Broch (vice-chair of Oygarden og Sotra Forsvars local defence association) plan to recover wreckage of 114Sq BB from lake and erect memorial plaque. Details bureaucratic problems. Would like to hear from P/O Bob Iredale, Sgt Denis Shanahan, Sgt John Townsend or Sgt Bob Willis who also on 27/12/1941 raid on Herdla by 114Sq, as detailed in Theo Boiten's 'Blenheim Strike'. On 27/12/1997 Torstein & friends went to Bergen cemetery and, at 12.02 (time of raid on Herdia), put candles on graves of aircrew of both crashed 114Sq BBs and wreath on memorial to all Allied WWII soldiers at Mollendal cemetery. Of 45 gravestones, 38 from RAF. Some had wreaths on from UK. Pics: Torstein and friends at cemetery. GW: 27/12/1941, two 114Sq BBs collided and crashed while attaching Herdla airfield. In V6227 F/Sgt R Fisher RAAF, Sgt J Williamson & Sgt W Fletcher KIA. In Z7500 Sgt K Davies, Sgt J Ward and Sgt J Kitley KIA. All buried in Bergen.
	7-8	Article	Random Recollections – 114 Squadron Part 1 – July 1939 to December 1939	Reg Stride	07/1939 Reg in 208Sq Army Co-operation at Heliopolis as WOM on Hawker Audax which once flew 260mph; BB's flew 279mph fully loaded! Saw first BB, K7103, at Heliopolis in 01/1938 on its way to 30Sq at Mosul for overseas testing (see pic 49/16). On return to UK posted as instructor to Radio School at Cranwell for 18 months then joined 114Sq at Wyton with BBs (at last!). Wyton shared with 139Sq, also with BBs. Here Adj F/Lt TT Warriner introduced Reg to CO of 114Sq, W/Cdr Spencer (ex-WWI Obs - felt like WWI film 'Dawn Patrol'). Details interview and questions asked incl if he spoke French, a/c he'd flown in (Bristol Fighter, Fairy Gordon, Handley Page Hyderabad, Westland Wapiti, Vickers Victoria and Hawker Audax). As an aircraft apprentice at Flowerdown in 1928 went to Worthydown to learn how to start

	Falcon engine of old Bristol Fighter. Details
	how this was done (swinging propellor,
	picket down harness, etc). Overseas Reg
	had served in Iraq, Egypt, and Palestine and
	had passed RAF Higher Education Test in
	France. Was instantly promoted to F/Sgt but
	not to mention until it appeared on DRO.
	Wanted to practice 'ZZ landings' but radio
	transmission restricted on security grounds.
	Reg remustered from WOM to WEM in
	charge of Signals and Electrical sections and
	responsible for ~ 20 Wop/AGs in need of
	written and practical tests and Morse Code
	training. Three months later these up-graded
	from 'tradesmen' to Sgt by Air Ministry.
	Refers to Roger Peacock also collecting
	aircraft cigarette cards, esp BBs (see 07/02).

	4-5	Report	Dronton Pilgrimage	Bill	Dronton is a new village on land reclaimed

5-6	Article	Memories of the Birth and Development of the Blenheim	Ray Bullack	from Ijesselmeer & has been hosting annual pilgrimages for 20yrs. In Journal 23/04 Bill reported on his first visit, noted BBs not mentioned in local museums (in spite of many losses over Holland – see Theo Boiten's 'Blenheim Strike') and requested BB models for the museums. Thanks Mike Simpson (MkIVF in display case), Mike Marshall (brass MkI) and former BB MkIV pilot Len Knight (brass MkIV – No 3 of 30 with authentication letters). Bill commissioned stand for MkIV & plaque saying from Blen Soc and AGA. Some 100 Air Gunners arrived in Dronton on 01/05/1996 & met hosts, along with contingent from RAF. Next day to school in Vassen where history teacher Harry Bouman and children performed Air Gunner's Tree of Remembrance and laid wreaths at shrine in forest and Bill presented M Simpson's boxed BB. Three days later Bill gave address, in Dutch, at Mayor of Dronton's reception and presented model BB and Group 2's 114Sq shield ('With speed I strike') for the Air Gunner's Memorial Museum. Major, Mayoress and Theo Boiten (from Groningen) welcomed his Dutch speech! Bill had Dutch friend, Joop Knol. After dinner were services at church and Town Hall monument, formally rescued from Zuider Zee by Lancaster aircrew. Due to lack of time Bill's host and wife (Airie Kouman, former concentration camp internee) will present BB models from Len Knight and Mike Marshall communicated with Dr Mike Williams who sought info about his father, P/O Maurice Williams (Wop/AG) who was in 21Sq based at Watton and KIA 12/08/1941 with crew on Koln Quadrath power station raid, one of 12 BBs lost. Dutch authorities encouraging other schools to adopt WWII aircrew; Dutch school-children already more knowledgeable about WWII then UK counterpart, but then we weren't occupied and starved. GW: see details Journal 37/08 Encouraged by Dinty Moore and George Milson, Ray relates his first contact with a Blenheim 142 when, as an apprentice
				working on main spar ribs of Hawker Audax wing, he was sent to experimental dept at Filton and saw full-size plywood model of Blenheim and shiny metal proto-type; the first monoplane he'd seen. He describes tactics used to observe Blenheim progress in spite of security once RAF involved. Ray was involved in production of wings and describes how the rivets were treated for the new 'stressed skin' method used on the BB. Details the various jobs he did (installing Browning cradle, chain & cable for ailerons) and issues over pay. He describes the new assembly hall at Filton with wings and fuselages in various stages, and all component parts put together so complete Blenheim emerged, which was towed down to Company's airfield at Patchway for flight testing before delivery to RAF. Experiments had already started on Beaufighter at Filton

L8748	3-5	Article	Phantoms	Ted Coote	Ted in 107Sq which, in 05/1939 moved from Harwell and, with 110Sq opened new RAF station at Wattisham were Ted a Wop/AG in BBs. On 12/05/1940 returning from Maastricht Bridge raid in L8748 force landed

				in Belgium. Describes the crash, being trapped, attempts to destroy his IFF unit, injuries to Obs Sgt Brown, arrival of van with RAF personel with 'P' on tunic shoulder. Was told 'P' was for Phantom. Crew taken to Belgian GQG where F/O Rotheram (their uninjured pilot) talking with Admiral Sir Roger Keynes and King Leopold of the Belgians. Ted and Brown treated Brussels hospital and next day at Ghent before being separated. Ted in hospital train to Le Touquet. After week Germans overran place and Ted became a PoW. His log bk destroyed while a PoW. In early 1990s Ted phoned by W/O Paddy Porter who researching RAF Wattisham. Via Paddy, Ted contacted by Stan Durban who researching 3 107Sq aircrew whose graves he'd seen in Belgium, KIA 12/05/1940, and whom Ted had known. Stan took Ted to PRO at Kew to view his ops record in Lossiemouth and Wattisham on microfilm of 107Sq ORB, including their crash near Belgian GQG. Then searched for 'Phantoms'. The Belgian Musee Royal de I'Armee et Histoire Militaire showed L8748 had crashed near Breendonk and Belgian GQG at Fort Breendonk. In 1994 found PRO file 'No 3 Air Mission (Phantom)' containing two messages dated 12/05/1940 concerning forced landing of L8748 (which reproduced on pages 4-5). The combined British Mission consisted RAF, No3 Air Mission; the Army, the Hopkinson Mission. The Missions aimed to co-ordinate Allied and Belgian air force actions and transmit this info to AOC with BAFF (Source PRO Air 35 230, and also 'Phantom' by Philip Warner). Also found signal from Air Attache Brussels about L8748 crash naming crew and a P/O Bixof, which quoted. Ted to Fort Breendonk in 1994, which

				for No 84 Squadron	Atton	at Habbaniya, Iraq, when it beseiged by

Rashid All's forces on 03/05/1941. Describes situation. Heinkel 111s bombed, Gladiators of No 4 FTS buzzed around, Messerschmitt 109s low-level over Euphrates with machine guns, Airspeed Oxfords taking off from hangars. Mentions fearless WiCdr CWV Ling, Chief Flying Instructor. New runway cut through golf course. On 12/05/1940 Tony Plinston led 6 BBs of 84Sq into Habbaniya. On 14/05/1941 raid on Palmyra by 2 BBs piloted by P/O Taylor and F/O Ken Linton (later in 211Sq and killed in Java). On 16/05/1941 raid on Bagdad-Monsul railway. On 23/05/1941 rest of 84Sq BBs arrived and ground crew set off for Habbaniya led by equipment officer P/O Bongard. After seige bridges, etc repaired for army's arrival (codename 'Habforce'). Then Colonel H de L Panet (chief engineer) sent Fred to Mosul with Quartermaster Sgt Edward Shand of Royal Engineers to build airstrips for 84Sq at Monsul, Ain Zala and Quayara. Given money, but no equipment, explain how could negotiate in French. Decribes work, problems of heat on equipment, gurkhas, problems encountered, negotiations with Sheik Awas el Hithmy at Quayara to use 200 tribesmen with shovels. Clouds of dust as BBs took off. Notes lift from Habbaniya to Mosul in airgunner's cockpit of Hawker Hind piloted by W/Cdr John Hawty (who made CO of Mosul in 08/1941) and force landing in desert, using starter handle to re-start engine. On return to UK 08/1941 Fred lost contact with 84Sq, but knows went to Western Desert under W/Cdr ADC Boyce (later AVM) and then to FE in 01/1942. Fred appointed Hon Member 84Sq Assn in 08/1993. 4-6	Report	Report to Members on Operating the Blenheim	Graham Warner	Since our BBs first flight in 05/1993 seen by 4m at airshows; no longer 'forgotten' bomber and alongside Spitfire, Mosquito, Hurricane, Gladiators and Lysander. Describes how two derelect hulks rescued from Canadian scrap; lists airshow visited in 1993 (Mildenhall, RAF Cosford, Biggin Hill, Duxford, Fairford, Sunderland, Leicester, Alconbury, Zoersel (Belgium), Wroughton and RAF Finningley). Also at closure of RAF Wattisham (Group 2 airfield of 107Sq and 110 Sq in 1939 and later 236Sq, 18Sq and 13Sq) so BB were both first and last a/c to fly there. Due to bad weather couldn't fly at 1993 Battle of Britain Memorial at Capel-le-Ferne with Spitfire and Hurricane as arranged with W/Cdr Geoffrey Page. With recession only 2 UK airshow in 1994 (Farnborough & North Weald where John Romain won Trophy), but flew at Le Bourget, Falaise, La Ferte Alais & Lyons in France, Tirstrup in Denmark and Eindhoven in Holland. Fewer airshows caused problems repaying loan and interest. Blenheim Dance profits bought GPS Navigation system (1994) and half insurance (1995). Details 1994 'good-will' trips to Hendon RAF Museum, Royal Yacht (D-Day anniversary), Filton (with two Luftwaffe Tornados), Bristol Aero Collection (parked next to a Concorde), BAe at Lostock, RAF Castle Camps (for Memorial opening), but missed Steeple Morden event. Also at closure of RAF West Raynham where 101Sq, 139Sq, 114Sq, 614Sq and 18Sq based flying BBs. Details event, recalls how W/Cdr Hugh Malcolm awarded VC, Red Arrows there and AOC 11 Group AVM John Allison took salute, with our BB last a/c to take off and fly low over final lowering of RAF Ensign. Stephen Connor wrote/directed 'The Spirit of Britain First' video, narrated by Stanley Baxter, including Roger Peacock's Blenheim poem. Both this video and 'Flight of the Blenheim' recommended (both sold at Duxford), 1995 VE celebration flights at Duxford, Southend, Chatham and over Buckingham Palace, and displays at North Weald, Mildenhall, RAF Cosford, RAF Halton, IAT at Fairford, 'Flying Legends' & IWM display a

7	Brighton Bull ****	Sid Sills	In 1942, having passed PNB Board at Heaton Park (Manchester) and staying at Hotel Metropole (Brighton) awaiting his move to EFTS, Sid describes an incident when on drill as a supernumeracy involving a drill instructor he encountered; neither instructor nor CO understood Sid's position.
7-8	The Outbreak of War	H Robson	02/09/1939 110Sq dispersed to Ipswich airport for raid on Oldenburg airfield, Hamburg. Old 10" to mile OS maps replaced by new 500,000 maps of north Germany. On 04/09/1939 5 BBs (not 6) targetted warships off Schillig Road. N6203, with pilot Canadian P/O Goulder and Robson as Obs, was stood down. Several months later, on return to Wattisham, describes pilot jettisoning bombs rather than waiting for armourers; worry when only one 'A' flight BB returned; the AG's 'Flying Bullet' insignia and 1/6 a day pay disappearing; details what happened to the crews on 04/09/1939, first raid of WWII, naming Sgt Harme (shot down by 5 Me 110s 'Destroyers'), F/Lt Doran and Sgt Abbot (lost over Stavanger), Robson flew with Sgt Miller and attacked by Me 109s but returned Lossiemouth. Doran PoW for 5yrs then died in DC 10 crash. Also names F/O Lings. In 05/1940 W/Cdr Sinclair became 110Sq CO and gave party at 'Swan' in Lavenham with a drinking competition; results described. Four aircrew named 'Robson' in 110Sq known as A1, A2, B1 & B2. Details how senior Obs Dave Pennington navigated in bad weather at wave-top height, he was source of 'washing hanging out' on German battleship story. At that time Ipswich had a grass airfield with NCO billeted in terraced houses and a field kitchen. Describes one 'prang'. GW: All 110Sq on 1st RAF raid of WWII on 04/09/1939; N6204, F/Lt K Doran, P/O S Henderson (attached from 42Sq Costal Command), Sgt D Pennington, AC J Smith; N6201, P/O G Lings, Sgt T Hammond, AC W Bingham; N6198, Sgt J Hanne, Sgt C Beavis, AC B Gray; N6197, Sgt R Abbott, Sgt L Bancroft, AC J Rosemond; N6199 FTR, F/O H Emden, Sgt R Grossey (attached from 42Sq Costal Command –

263 Squadron	2-3	Article	An Airman Looks Back	Pat Griffith- Jones	In over 6 years in RAF Pat describes St Eval as his worst posting (food, accommodatiosn, feuds, etc) when dispersed away from 263Sq HQ, with its Westland Whirlwinds, and next to a Beaufort Squadron. Describes detachment to Aldergrove (near Belfast), route, stop-over at Silloth (near Carlisle), conditions, flying there in Handley Page Harrows and returning by ship to Heysham. Later 236Sq moved to Carew Cheriton, Pembrokshire; describes 24hr train journey incl air-raid at Plymouth. Main work of 263Sq at St Eval and Carew was convoy escort; refers to Fastnet Rock's location. Recalls events at Carew; all a/c being used in hunt for Bismark; painting egg-blue underside of BB's black for night ops (believes 1,000 bomber raid); below-tree level pass over Carew by CO F/Lt Power (RAAF); effects of air raid incident on base; double BST duty rotas; days off to Tenby or Carmarthen, lifts in lorries and one with lady in MG!; names Sgt Parish (later commissioned), his Sgt pilot friend 'Tiger' and P/O Stevens DFM. Jefford: Dates: 236Sq moved to St Eval 08/08/1940 & to Carew Cheriton 21/03/1941
Maintenance	3	Letter	From W McFarlane	W McFarlane	10/05/1940 McFarlane, RAF ground crew on pass in London, heard news of German invasion of Low Countries and Churchill took over from Chamberlain. 11/05/1940 gets recall telegram & sent direct to Maintenance Hanger. Describes 'patching up' and modifying a/c, 7am starts, frequent 24hour shifts with 6hrs off, but also a week off as 'rest'. Describes some a/c damage encountered. Asks truth about Canadian exbush-pilot fitter-mechanic who supposedly stole an a/c & RAF shot down over Channel in 07/1940. Note: Article illustrates pressure on Maintenance staff.
Early Blenheim flying	4-5	Article	Landings	Sq/Ldr G Haworth DFC DFM	In 1938 Sq/Ldr Haworth was at Waddington with 44Sq where new BB bombers based. Haworth contrast experience as Obs in open cockpits single engine bi-planes with his first BB flight. There was no 'study course' for BB pilots, who learnt on the job; speed, two engines, retractable wheels, landing flaps, adjustable airscrew all caused problems. Also lack of training, no set 'crews' or preflight planning and expectation that could 'scamble' bombers. Details seeing worried look on pilots face and clear view of fast approaching ground, old convention of 'dead stick' (no throttle) landing all made early landings nerve-wracking. Describes his pilot landing at BAC, Filton in front of crowd of workers at 3 rd attempt and comments from Mr Cyril Unwin, senior test pilot with Bristol Company, about use of landing flaps. Dilemma of when an Obs should advise a pilot! Well written, very interesting article with gives insight into impact of flying/landing new BBs in 1938 & the high crash rate.

					Jefford: At Waddington 44Sq had BB Mk 1 12/1937 to 02/1939 and 110Sq 01/1938 to 05/1939. GW: Pics – 110Sq, K7144 burst tyre & tipped up on landing 1938 (DBR 14/03/1939 when engine cut and bellylanded). N6196 Mk IV DBR 26/06/1939 when brakes failed & over-ran at Wattisham
	5-6	Article	Flight Mechanic at 17 OTU Upwood	JD Bottle	After Flight Mechanics course at Morecombe Bottle posted 17 OTU at RAF Upwood with BB Mk I & Mk IV on 'C' flight. Long working hours & recalls 1,000 bomber Cologne raid when BB's used to rescue ditched air-crews. Occasional 'test flight' and describes 'hedgehopping' near Ramsey, Huntingdonshire. Describes a BB crash at 50' on take-off. Some flight mechanics trained in aerodrome defence; describes practice with low-flying BB. 17 OTU later moved to Silverstone with Wellingtons. Later Upwood's grass replaced with hard runways; 156Sq and 139Sq there with Lancasters on Pathfinder duties
14 Squadron	6-7	Article	14 Squadron	John Willis	Extracts from John's long & careful report on 14Sq using some info from PRO. This showed 14Sq's last op in East Africa on 03/04/1941 with 7 BBs (pilots Stapleton, Hill, Buchanan, Le Cavalier, Lewis, McKenzie and Illsley). It then moved from Port Sudan to LG 21 (7miles SW Daba) on 31/03/1941. On 05/05/1941 8 BBs bombed MT at Tobruk, Bir Aziz & Barbia; 10/05/1941 bombed Derna Satellite & 3 BBs recce Tobruk, Gambut & El Adem; Sgt Taylor attacked by CR42 & crash landed E of Sollum. 11/05/1941 4 BBs on night raid, one crashed Aboukir. 15/05/1941 8 BBs bombed MT nr Sollum/Halfa Pass. 18/05/1941 again bombing. Following week 5 of 7 BBs lost over Capuzzo & Tobruk, and 5 more lost on raid on Maleme, Crete by JU52s. This explains why 14Sq 'depressed' when Willis (& 4 others from 70 OTU Ismailia) joined 14Sq at LG 21 on 04/06/1941 as 'replacement' crew with 23hrs flying on BB Mk I, Hart and Audax a/c at 4 SFTS Habbaniyah. Sq/Ldr Stapleton taught conversion to Mk IV, use of 9lb 'boost' (to outfly 109s) & tight formation flying. First op 17/06/1941 in Sisi Omar then Sollum areas. Vichy French in Syria so 14Sq moved to Tetah Tiqva, Palestine on 0907/1941. Details incidents and accommodation, his spell in Haila Army hospital, and convalescence near Jerusalem where he and Paul Reynolds befriended by family from Tel Aviv. 14Sq spent 08/1941 formation training ending near Mosul in N Iraq/Persia and leafletting raids over Tehran where saw Hawker Biplanes. Mosul hot (described); John flew COs Audax to Habbaniyah for FFI treatment for wayward lad; CO Stapleton left 14Sq at end 10/1941.
	7	Article	The Far East	G/Cpt CH Boxall	Writing from Zimbabwe, Boxall recalls that on 1 st raid against Germany in 04/09/1939 BB Mk IVs used; when Japanese invading Malaya first raid on 08/12/1941 by 62Sq with BB Mk Is! 62Sq equipped with Mk Is 1938, flew to Singapore 1939, no BB spares or replacements reached FE; by 12/1941 flight radius restricted by oil consumption! Reinforced with few more MK 1s and fight against Japanese continued until all BBs

					lost/destroyed and most crew killed or MIA.
	7	Article	62 Squadron	A	Butterwoth gives a potted history of 62Sq
			5_ 5qaaaioii	Butterworth	from 09/1939 to 31/01/1963 covering costal
					patrols/trainig at Singapore; after 12/1941
					invasion, attacks on Japanese shipping off
					Thailand from Malaya; loss of most of 62Sq
					BBs at airfield; re-equipment with Hudsons
					and withdrawal to Sumatra; move to Burma
					and absorbing remnants of 139Sq; continued
					shipping/airfield attacks & recces over Bay of
					Bengal; 05/1943 62Sq withdrew, converted to Dakotas and, from 07/01/1944, dropping
					supplies to 14 th Army Front in Burma; from
					end WWII on general transport duties until
					disbanded 15/03/1946; 01/09/1946 76Sq re-
					numbered 62Sq at Mingaladon, Rangoon,
					flying Dakotas; in 03/1947 moved to India,
					re-equipped, but disbanded 10/08/1947;
					08/12/1947 62Sq re-formed at Waterbeach,
					flew Dakotas on Berlin Airlift until disbanded
					01/06/1949; re-formed 01/02/1960 at
					Woolfox Lodge as ground-to-air missle unit; until finally disbanded 31/01/1963.
62 Squadron	7-8	Article	62 Squadron	PW Smith	62Sq equipped with BBs 1938 and left
In Far East	, 0	7 11 11 010	Singapore	DFC	Cranfield for Singapore 08/1939 with 12 BBs
			3-17-3-1		(L1339 crashed en route). Stationed Alor
					Star (N Malaya) when Japanese attacked;
					lost most of their 11 a/c. Sq/Ldr Scarf earned
					VC (see 'Bristol Blenheim' by Chas Bowyer).
					Wth rapid Japanese advance 62Sq returned
					to Singapore where still attacked daily so
					evacuated to Palembang, Sumatra. In 1941 Smith with 59Sq, Thorney Island, flying ops
					over Channel in BBs. Re-equipped Hudsons
					09/1941. In 12/1941 half 62Sq crew told
					going to Singapore, as were half 53Sq from
					St Eval. Tested new Hudsons at Kemble &
					left 07/01/1942; other crews left earlier or
					later. Some arrived Singapore before
					evacuation; Smith got to Palembang and
					62Sq on 26/01/1942, others only made
					Calcutta as Rangoon re-fuelling stop
					captured. Two Palembang airfields; P1 Dutch with Hurricanes, P2 a jungle clearing.
					Describes chaos with crew from Squadrons
					(incl RAAF 8Sq) from all over SE Asia, few
					a/c (Hudsons and BBs) and no admin.
					Suddenly told to evacuate & destroy
					everything as Japs at P1 and get to port in
					south Samatra. Describes evacuation to
					airfield in Java, which soon attacked; no
					defences, a Buffalo fighter tried but not seen again. Packed into Dutch merchant ship
					'Kota Gede'; terrible conditions, Captain took
					them to Ceylon which probably saved their
					lives as ship to Australia sunk by Japanese
					fleet. Describes journey to Cuttack (east
					coast of India) via Colombo and Karachi
					where 62Sq re-formed, some raids on
					Burma from India, but a/c spares non-
					existent. 11/1943 moved to Rawlpindi (NW
					Frontier) and learnt to fly/drop supplies from
					Dakotas. Returned to Bengal and pressure on; in 02/1944 Smith did 30 ops trip to
					Burma in 26 days. Smith returned to UK for
					invasion of Europe, but 62Sq in India/Burma
					until WWII ended.
					GW: 17/09/1939, L1339, 62Sq, crashed on
					landing at Trang, Siam, en route to Tengah,

	5-6	Article	Operating the Blenheim	Graham Warner	After 'First Flight and Naming Ceremony' at Duxford 28/05/1993 our Blenheim had busy year with events at Mildenhall, Biggin Hill, Cosford, Alconbury, Sunderland, Leicester, the IAT at Fairford, Finningley, 'Great Warbirds' at Wroughton, the Zoersel in Belgium and 'Classic Fighter' and Main displays at Duxford. See by over 2 million people. Fact sheets handed out. Also at RAF Wattisham closure (where 107Sq, 110Sq, 18Sq, 13Sq & 226Sq based) Ipswich airport and Bleheim Palace; present Duke of Marlborough recalls BBs at 13 OTU. Good media coverage and income. Missed events at Steeple Morden (home 17 OTU with BBs 13/01/1943-04/05/1943) and HM Queen Mother at B of B Memorial on Cliffs of Dover due to atrocious weather. John Romain flew BB; no events missed. 1994 disappointing; only Flying Legends at Duxford invited Blenheim back. Romain won trophy for display at North Weald 05/1994. Air Displays at Le Bourget, La Ferte Alais and Falaise in France, Tistrup in Denmark and Eindhoven in Netherlands hardly covered costs so income down and none of loan repaid. BB made goodwill visits to RAF Museum (Hendon), B of B Memorial (Dover), Castle Camp, D-Day flypast over Britannia, BAe at Lostock and Filton (home of BAC); contrasts with poor treatment at SBAC Farnborough. Closure of RAF West Raynham very moving;

AC1 Raymond Trew (Wop/AG)	3-5	Article	Finland Remembers – Fifty Years On	W/Cdr Peter Green - 1990	Vivid account of a secret mission to deliver 12 BBs to Finland. Six volunteers from Watton sent to RAF Bicester in civilian clothes; one was AC1 Ray Trew (Wop/AG) of 21Sq. At Bicester were 36 'civilian' BB aircrews from various Squadrons and 12 BB Mkls to deliver to Finnish Air Force in fight against Russia. The BBs were unarmed and Finnish swastika-like insignias were whitewashed over. Uneventful flight via Dyce (Aberdeen) on Day 1, Stavangar (Norway) on Day 2, Vasteras (Sweden) Day 3, then Lake Juva (Finland) on 26/02/1940. Coach to Helsinki on 27/02/1940 where Finnish appreciation described. Next day to Turko Abo airfield & flown in Ju 52 to Stockholm; details stay there with Leo Lightfoot (Wop/AG). On 12/03/1940 21Sq crew flown to Perth via Oslo in Ju 52. Back at Watton Trew completed 25 more ops against Wehrmach before leaving 21Sq. Leo Lightfoot awarded DFM when he shot down an ME109. On 06/12/1990 at Finnish Ambassador's residence Winter War Commemorative Medal awarded to Ray Trew & families of other crew members. Leo received his Medal in Aukland, New Zealand (where he lives). Leo and Ray both Blen Soc members. Ray would welcome contact with others on this 1940 BB delivery to Finland. Pics: Blenheim with Finnish swastika whitewashed, Bicester 1940; Two BB taking off at Bicester for Finland. Both pics by Ray Trew. <i>GW: p172, 12 BBs (including L1345, L1347, L1354, L1362) left Bicester for Dyce then to Juva, via Stavanger & Vasternas arriving 26/02/1940. BBs re-numbered in Finland BL134 to 145, some given ski-undercarriages and used in 105-day 'Winter War' against Russia; Finland surrendered 13/03/1940.</i>

6	Wanted	Ejection Seat for Blenheims?	Mike Bennett	Mike is a school teacher collecting information on ejection seats, escape capsules, assisted aircrew escapes, extraction systems etc. from first (1910 his earliest). Has contacted manufacturers world-wide and ejectees: names Doddy Hay, Jo Lancaster (1st Brit ejectee), Behgt Jarkenstedt (1st Swedish ejectee), widow of Rechliner Erprobungsspringer Wilhelm Buss (Ju-87B in 1941) & a Heinkel He219 crew (1944-1945). Requests info on further ejectees. Lists info he'd need ref time/place/type aircraft, seat details, etc. Would like any ejection drawings, unused 'patents' etc, related items (however small) and Folland or ML Aviation seats pics. From article in 1947 Air Reserve Gazette he traced people who worked on a Vickers Supermarine ejection seat (only 2 made).
7-8	Article	21 Squadron Disaster at Stavanger – July 1940	F/Lt Harry G Huckins DFC	Following disaster after 11/05/1940 at Maastricht (5 of 6 21Sq BBs lost; mentions LAC Guest Wop/AG), Dunkirk & 'Les Amdelys' raid, 21Sq posted Scotland (24/06/1940); describes Lossiemouth, near Inverness, relief and fun of summer evenings ('Grand Hotel' Elgin). Huckins, P/O Dick Rogers and Bill Bradshaw about only 21Sq crew to survive 2 months & 20 raids after 'blitz' of 10/05/1940; mentions 'sprogs', Luftwaffe's role; article he'd written about escape from France; practicing formation flying, 2 a/c lost (see below). On 11/08/1940 12 BBs (6 each from 21Sq & 139Sq or 115Sq 'A' flights) took off for Stavanger. Only 3 BBs returned as formation, ill equiped with Vicker K turret gun, met 'horde' of fighters; no 21Sq BBs returned; CO W/Cdr Bennett & crew washed ashore in dinghy in Denmark. Little info on rest of 21Sq as no survivors. After this disaster raids limited to 50 miles off Norwegian coast. Describes raid on Lossiemouth by Heinkels at 50'; 2 BBs destroyed. 30/10/1940 21Sq returned to Watton. Mentioned Castlvetrand raid form Malta 12/1942 as 'pay-back' for 21Sq's earlier losses when Huckins lead Obs and 44 a/c destroyed. Ed note: Blegian members say Maastricht bridges were mined, but this sabotaged. Note: Found this a rather confusing reminiscence of 21Sq's historic role, but good on life at Lossiemouth and vagueness of info received by surviving crews. GW: both 23/07/1940, 21Sq; R3820 spun into sea 1 mile off Lossiemouth during practice bombing on sea marker; crew P/O T Powell, Sgt C Smewin & Sgt D Mobberley killed. R3872, overshot landing Lossiemouth. Ran into Watch Office, P/O Carson safe. GW: 09/07/1940, 21Sq, following FTR to Lossiemouth from Stavanger, all shot down

					into sea (except R3914), all commemmonrated on Runnymede Memorial unless outwise stated: R3732, crew W/Cdr L Bennett, Sgt A Summers & Sgt C Burt KIA. W/Crd Bennett's was washed ashore nr Lonstrupp, Jutland 29/09/1940 & buried Lonstrupp churchyard; R3822, crew P/O J Heath-Brown, Sgt W Hamlyn, and Sgt E Williams KIA; R3876 crew Sgt J Brown, Sgt C Stevens & Sgt J Morton KIA, Sgt Brown buried Trondheim cemetry; N3619, crew P/O W Macley, Sgt W Rawson & Sgt J Dorrington KIA; L8872, crew F/Lt J Murray (NZ), Sgt W Hartley & Sgt G Duck KIA; R3914 not lost but badly damaged & crashlanded at base, P/O Rodger (pilor) & Sgt Spillard (Obs) injured, a/c repaired. 57Sq losses on same 09/07/1940 raid; R3750, crew P/O R Hopkinson, Sgt J Andrew & Sgt G Miles KIA; R3847, crew Sgt F Mills, Sgt S Newcombe & Sgt T Jervis KIA.
Sgt W McConnell	8	Article	Survival in the Desert	WJ McConell	27/05/1941 14Sq WJ McConnell Wop/AG on raid to Meleme airport & Suda Bay, Crete, with F/O McKenzie (Pilot) & Sgt Fearn (Obs); details parachute problems. 3 BBs took off, McKenzie leading; one returned with engine trouble. Describes raid & encounter with Ju 52s and Messerchmitts. Reached Egyptian coast midnight low on fuel and with two fused bombs unreleased. Describes baling out, problems with 'chute & lost water bottle. Crew arranged to meet at crash site. Details how he found his way in desert & located water but no food. By day 6 very weak but saw ridge (turned out to be Quatara Depression south of Mersa Metruh). Saw 216Sq Harrow and was later picked up later as was Robert Arthur Fearn (Obs) who had followed McConell's arrows and used his water-holes! 3 day search around crash site by Military Police Motor-cycle Patrol didn't find pilot (detailed). In sick bay eiyh Bob Fearn. NCO Cpl Simon explained 'chute problem. McConell lost 5 stone & posted to Ferry Unit. Never heard more about McKenzie or Fearn. Well written account. GW: 27/05/1941, 2338, 14Sq, FTR; abondoned in air while lost after raid on Maleme airfield; F/Lt M McKenzie (Pilot) never found, Sgt M Fearn and Sgt W McConnell survived 5 days in desert, rescued by Army patrol.
